Trygve

New safety app in our community.

Hi. We have started using the new app **Trygve** and we think you should get involved!

Trygve is a free community safety app that creates a digital Neighbourhood Watch, allowing users to connect, work together and look out for each other through a variety of features.
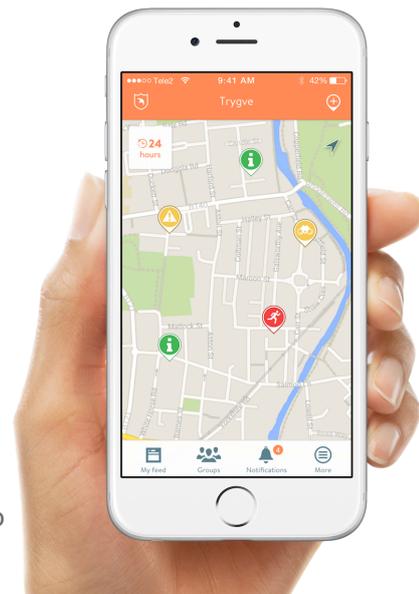

By using Trygve, we want to help create a culture where safety and security is enhanced and reinforced by our community's own efforts.

Why Trygve?

Successful track record - over 2,000 communities throughout Sweden connected and actively using Trygve.	Available on iOS and Android devices, as well as computers.
Available UK wide.	Trygve is completely free.

Trygve features

- Incidents ('events') are pinned directly onto a map. Users can acknowledge events, comment on them or share them through other channels.

- When posting an event, users determine its category and priority - higher priority events send an instant alert to nearby users' devices.

- Users can create groups within Trygve to communicate with other users. Groups can be:
  Public (suburbs, neighbourhoods, etc)
  Locked (dog-walking club, Neighbourhood Watch groups, parents clubs, etc)
  Private (friends, family, neighbours, etc)

- Trygve features a Personal Safety Alarm, which can be easily set to activate on a timer or triggered manually to immediately alert others if a user runs into trouble - great for walks home!

How do I get involved?

1. Download Trygve onto your device by searching for 'Trygve' in the App Store or Google Play or visit www.trygve.co.uk
2. Invite others to join Trygve - friends, family, colleagues, neighbours, local groups.
3. Start collaborating! Post, share, comment and work with your fellow users to create a stronger, safer society.

Join the exciting community movement now!
